5493395

Blind thermostat with radio receiver compatible with Nobo Energy Control. Economy/Comfort settings defined in App. only.

Take control of your household heating with Energy Control and reduce your energy consumption by 25%. Lower electricity consumption and greater heating comfort have never been simpler to achieve.

NCU thermostats 1R, 2R and ER allow you to make your Nobo heaters compatible with the Nobo Energy Control.

NOBO Energy Control is a wireless energy control system developed in our Norwegian laboratory for the purpose of controlling the temperature in your home via our Nobo Energy Control App (Smartphone or Tablet). The App can be downloaded and upgraded for free via the App Store (iPhone) or Google Play (Android).
